## How to download? ✦

### Step 1: Go to [transcendstore.com](https://transcendstore.com)

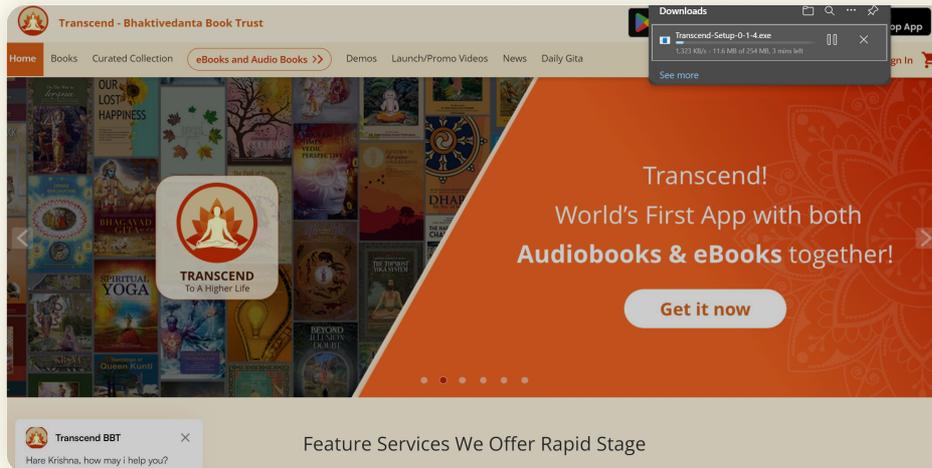

Click on the download "Desktop App" button present on the top right corner

## Step 2: Download in Progress

The desktop app file will start downloading automatically. Wait until it's finished.

## Step 3: Start Installation

Open the downloaded file. This will start the installation of the Desktop App on your device.

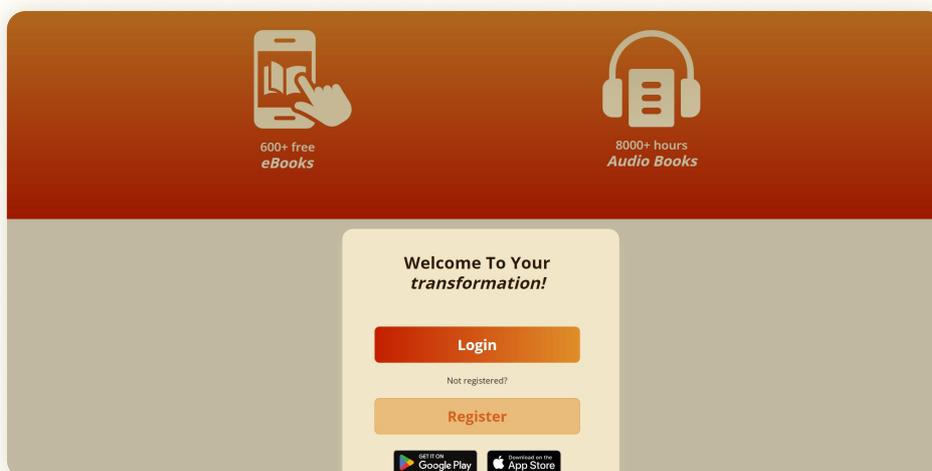

## Step 4: Ready to Use

After installation, the Transcend Desktop App will be available on your taskbar for easy access.

## Step 5: Log In or Register

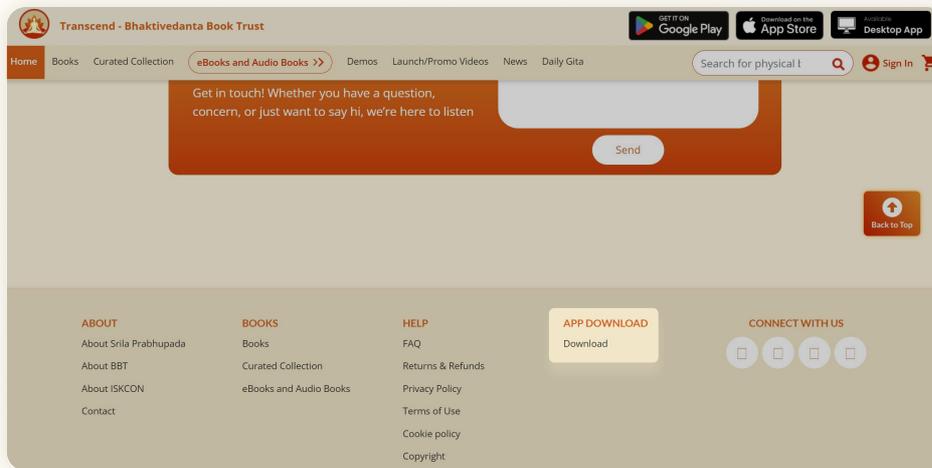

Please Login to the App with your registered email address and password else Register and then Login to the Desktop App.

What if the Desktop App does not download automatically then, try this:

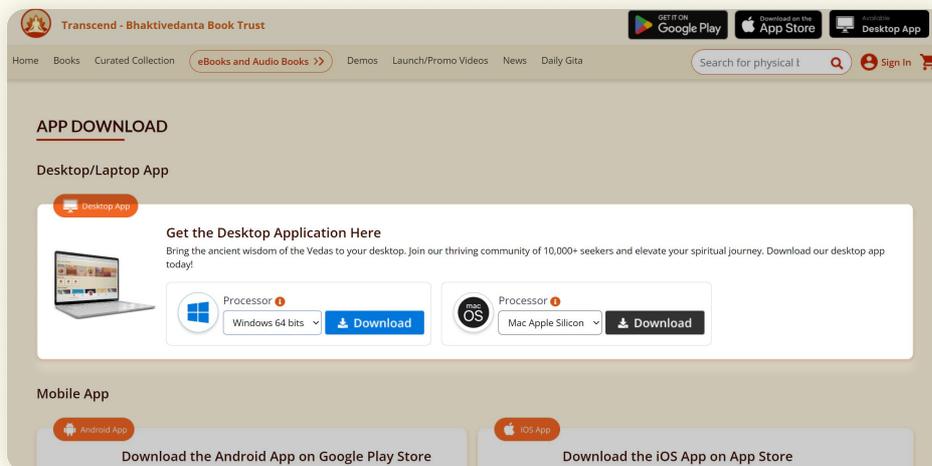

## ★ Step 1: Go to the footer section 'App Download'

Scroll down the Transcend Store website to the bottom(footer section). Click on "App Download" from footer.

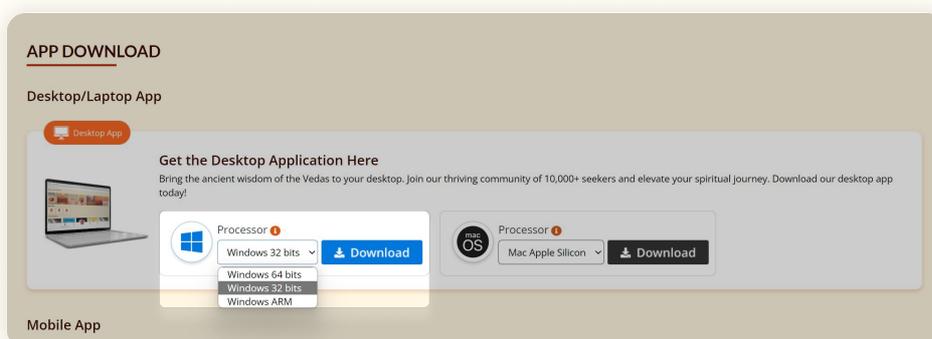

## ★ Step 2: Select Your Version

Navigate to the "Desktop/Laptop App" section and choose the right version for your computer (Windows or Mac) from the drop-down.

## ★ Step 3: Choose Your Processor

Select the right processor version for your computer from the dropdown menu. Click on "Download".

## ★ Step 4: How to find the processor information on your **Windows Laptop/Desktop?**

- Click on the Windows Start button.
- Select Settings (the gear icon).
- In the Settings menu, click on System.
- Scroll down and click on About.
- On the About screen, you will see details about your processor, memory (RAM), and other system information, including the Windows version.

## ★ Step 5: How to find the processor information on your **MacBook/Apple Computer?**

- Click on the Apple menu in the top-left corner of your screen.
- Select About This Mac.
- In the Overview tab, look for the line that indicates either 'Chip' or 'Processor'.
